CHALLENGES

Companies face numerous challenges with their mobile services:

BELOW ARE 5 REASONS TO CONSIDER MOBILESAGE:

1. SAVES THE MOST MONEY

Mobile Sage operates with a fiduciary responsibility to secure the best pricing for devices, service plans, and security—without conflicts of interest.

The company provides unbiased, comprehensive wireless telecom expense management to maximize cost savings.

SAVE UP TO 60%

MobileSage telecom expense management identifies and implements savings across carrier plans, devices, security systems, and staffing, dramatically reducing the internal costs of mobility management (we are aware of the best rates from constant negotiations).

CARRIER & SECURITY PLATFORM AGNOSTIC

Unlike carriers and security platforms that promote their own plans, Mobile Sage provides impartial recommendations to optimize cost savings ensures the best possible terms, often uncovering savings and service improvements not typically disclosed.

DEVICE LIFECYCLE & ASSET RECOVERY

Optimizes trade-ins, facilitates resale, recycling, or tax-deductible donations to maximize the recovery value of retired devices.

ELIMINATES BILLING ERRORS

Prevents unnecessary charges from inactive lines, lost devices, and unmonitored accounts.

NEAR REAL-TIME COST MONITORING

Unlike traditional expense management options that rely on outdated monthly reports, Mobile Sage proactively responds to alerts and takes immediate action to prevent unexpected charges, such as unauthorized international calls or excessive data usage.

1. PAYING WAY TOO MUCH

Organizations often pay for dozens of inactive lines, overage charges, and overpriced cellular plans by not frequently auditing and leveraging all available carrier promotions. One was paying $300k for security services they never deployed.

2. IT IS ALREADY SWAMPED

Businesses often offload the job of managing mobile devices to IT, but they are already buried with critical security and infrastructure projects and don't have time to become mobility experts. They can get crushed when trying to stage and set up new phones—resulting in weeks of delays.

3. SECURITY & COMPLIANCE RISKS

Lost, stolen, or unprotected devices expose businesses to data breaches, and massive regulatory fines ($50k HIPAA violation for a single unencrypted phone). Orrisked regulatory penalties due to missing security policies on employee phones.

Most companies don't have professional team members managing their mobile systems and need help.

2. SAVES THE MOST TIME

Unlike alternatives that only handle a subset of your needs, Mobile Sage provides full-service mobility management, eliminating the need for research, procurement, staging setup, and ongoing support—allowing IT teams to focus on higher-priority projects.

ORDERING, STAGING & KITTING
Manages device provisioning, security, configuration, and distribution, reducing delays and IT workload.

INVENTORY TRACKING & LOST DEVICE MANAGEMENT
Maintain control over company assets and minimize

SEAMLESS ONBOARDING & OFFBOARDING
Ensures smooth transitions for employees while preventing device loss or unauthorized access.

CONCIERGE-LEVEL END-USER SUPPORT
Provides dedicated helpdesk support, eliminating the costs to build and train an internal support team.

3. ENSURES MAXIMUM S ECURITY & COMPLIANCE

Mobile Sage provides unique security services to help organizations meet industry requirements, focusing on protecting sensitive data. Including, several services that are critical for regulated industries.

ACCEPTABLE USE HR & SECURITY POLICIES

Helps create the policies required by HR and IT departments on how company data and assets are to be used, including: limiting use, inappropriate content, protecting company data, complying with regulations, defining working hours), monitoring disclosures and IT protocols (backups, passcodes, VPNs, and WI-FI security).

ENTERPRISE-GRADE MOBILE SECURITY

Includes remote wipe, policy enforcement, mobile application management (MAM), hardware deployment, and asset tracking.

REGULATORY COMPLIANCE SUPPORT

Assists with GDPR, SOC, HIPAA, OSHA, CIPA, and other industry-specific regulations for healthcare, finance, education and government sectors.

MDM, EMM, UEM & VDI SOLUTIONS

Helps businesses select and configure the appropriate mobile security platforms.

COMPANY-ISSUED VS. BYOD POLICY ENFORCEMENT

Ensures security policies are applied across both corporate and personal devices to reduce risk.

IOT & ASSET TRACKING

Secures and monitors IoT devices and critical business assets to prevent unauthorized access.

RISK REDUCTION & PENALTY PREVENTION

Helps businesses avoid costly compliance violations, such as HIPAA fines of up to $50,000 per infraction.

4. PRICE PERFORMANCE LEADER

Mobile Sage telecom expense management delivers industry-leading value, often generating substantial cost savings compared to traditional commission-driven providers. Plus, there is NO RISK.

FLEXIBLE PAYMENT MODELS

Offers a cost structure based on a percentage of savings, or a one-time fixed costs with all necessary services included, plus staff training with an action plan.

MANAGED SERVICE OPTION

Or, provides a fully outsourced, proactive mobility management service—instead of training and tying up existing staff.

PROJECT-BASED ENGAGEMENTS

Available al-la-carte for specific needs such as security implementation, staging and kitting, plan negotiation, HR policy creation, and more—either direct or through alliance partners.

MONEY-BACK GUARANTEE

Ensures that if the service does not generate more savings than its cost, a refund is provided for the realized savings.

COMPLIMENTARY AUDIT & CONSULTATION

Includes a FREE mobility and telecom expense management audit and a one-hour consultation with actionable insights for optimizing mobility strategies.
